OICRF Annual Report 2019

OICRF - the International Office for Cadastre and Land Records - is a permanent body of FIG. OICRF serves as a documentation and study centre for land administration.

The OICRF Land Administration Library in 2019

OICRF maintains a digital library that contains almost 18.500 publications. OICRF contents are available in different languages. All of the available documents and the most recent publications can be accessed electronically at www.oicrf.org.

Standardisation in Land Administration

OICRF is strongly involved in the development of standards related Land Administration. This concerns the ISO 19152 Land Administration Domain Model (LADM) and the Social Tenure Domain Model (STDM).

The second edition of the Land Administration Domain Model is under development. There is agreement within ISO TC211 to publish LADM Edition II as multipart, as follows:

Part 1 - Land Administration Fundamentals

Part 2 - Land Registration

Part 3 - Marine Space

Part 4 - Land Valuation

Part 5 - Spatial Planning Information

Part 6 - Implementations

It is now time to provide proposals for new LADM parts. It is planned to involve the FIG Commissions into this process – and UN organisations and platforms as well as the World Bank, IHO, OGC, Cinder/lpra, etc.

Contact

OICRF does its utmost to provide the best possible service for anyone who requests information. This is made possible by the support of our host: Cadastre, Land Registry and Mapping Agency – Kadaster – of the Netherlands.

Prof Christiaan Lemmen
OICRF director

Ms Pauline van Elsland
OICRF secretary
