

**FIG Director General Forum (DG Forum)**  
**held during FIG Working Week 2024 on 21 May 2024 in Accra Ghana**

The DG Forum gathers around 30 persons representing governmental agencies and institutions from all around the world. The speakers in 2024 focused on various aspects as Sustainable Developing Goals and the challenges and gaps in the geodetic infrastructure in Africa.

The forum also heard from countries as Ghana and Nepal on current situation in the geospatial and cadastral area. The Forum was concluded with a short Q/A-session.

It is clear that the challenges that are present in many countries are similar but the situation, of course, differs a lot. The discussion covered capacity and capability, funding as well as legal and policy issues.
