

LAND INFORMATION MANAGEMENT: FROM RECORDS AUTOMATION TO CITIZENSHIP ON-LINE

Prof. John McLAUGHLIN, Canada

Key words:

ABSTRACT

This presentation will review the history of computerizing land information over the past three decades, examine the over arching trends (from automating land records, through networking/infrastructure development, to e-government and business geographics), and discuss the most important current LIM challenge (contributing to more effective citizen participation in public decision-making).
