# Goal of Zveza geodetov Slovenije

Slovene Association of Surveyors

The Slovene Association of Surveyors driving idea for today and for tomorrow

**“Let the changes represent opportunities and not threats.**

**Let's create the changes and not only accommodate to them, as they dictate. Let's manage the changes.**

**This is our only way and only this way and no other leads to our sole common and final objective;**

**self confidence and identity, reputation and prosperity of our geodetic community and it's every individual.”**
