

GSDI Global Spatial Data Infrastructure

Convergences between Geo Spatial
Communities: key decision for "decision
making"

April 14th 2010

Bas Kok

GSDI Past-President

Director of International Affairs, Dutch Kadaster, NL

Associate Professor, TU Delft, NL

XXIV FIG International Congress 2010
11 - 16 April 2010 Sydney, Australia

<http://www.gsd.org>

1

Contents

- Rapidly changing geo spatial landscape
- Global problems
- Geo spatial community responsiveness.....
- Conclusions

<http://www.gsd.org>

2

Contents

- Rapidly changing geo spatial landscape
- Global world problems
- Geo spatial community responsiveness.....
- Conclusions

<http://www.gsd.org>

3

- Rapidly changing geo spatial landscape
 - fast growing internet and mobile technologies
 - fast growing Digital Earth and Virtual Earth related industries
 - citizens more spatially enabled
 - strong growth geodesy sciences, products and innovative approaches
 - increasing voluntary user communities
 - increasing use of cloud computing systems
- Global world problems
- Geo spatial community responsiveness.....
- Conclusions

<http://www.gsd.org>

4

- Rapidly changing geo spatial landscape
- **Global world problems**
- Geo spatial community responsiveness.....
- Conclusions

<http://www.gsd.org>

5

Global World Problems

- Increasing global warming
- Wasting of energies & resources
- Extreme emissions growth
 - Carbin dioxide (CO₂)
 - Greenhouse gas (CH₄)
 - Sulphate dioxide (SF₆)
 - Nitrogen dioxide (NO₂)

<http://www.gsd.org>

6

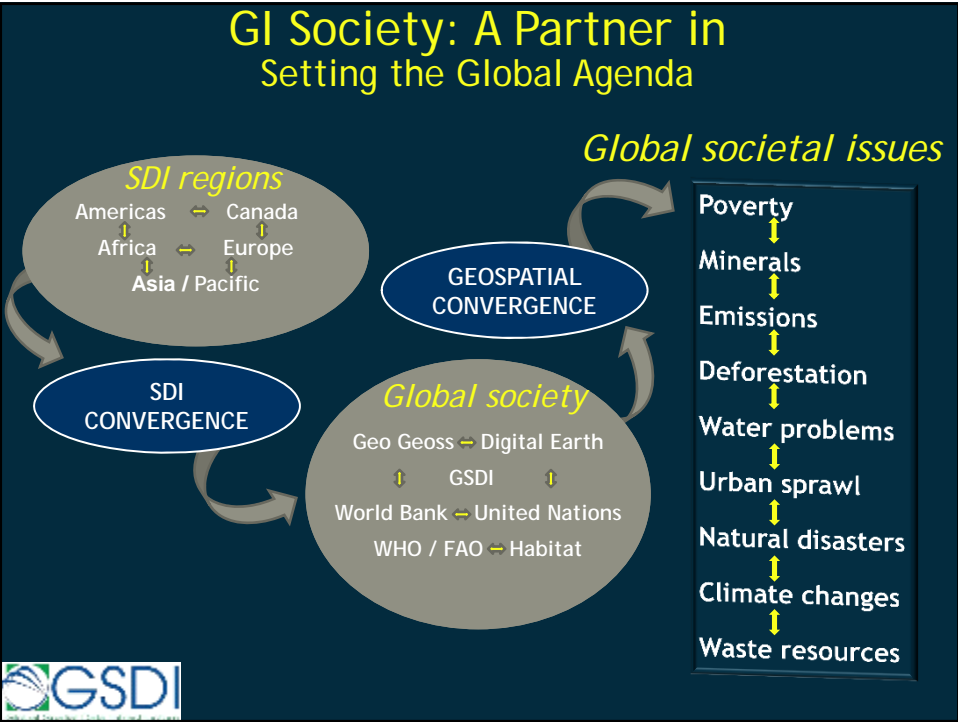

- Rapidly changing geo spatial landscape
- Global world problems
- **Geo spatial community responsiveness.....**
- Conclusions

GSDI

7

Convergence among Geo Spatial Communities

- Bridge building between sectors (Convergence)

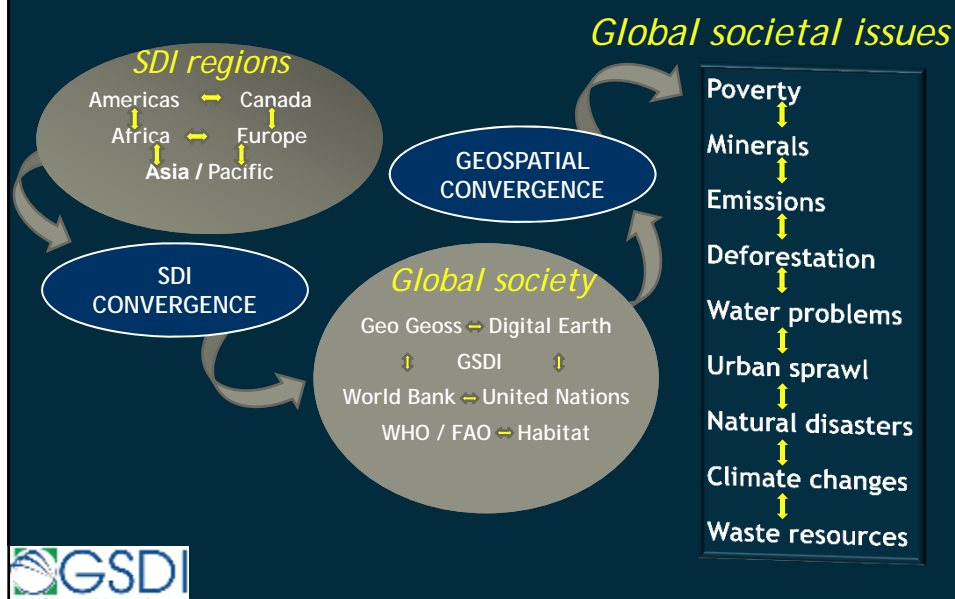

- Convergence
 - Central theme in GSDI Strategic Plan
 - Launched at GSDI 11 Conference (June 2009)

<http://www.gsd1.org>

9

GI Society: A Partner in Setting the Global Agenda

Driver European SDI Successes

- Leadership defined and accepted
- SDI laid down in Directive and National EU legislations
- Participation on all levels arranged
- High quality data sets and access tools essential part of legal framework

<http://www.gsd.org>

Dutch Kadaster information hub in eGovernment

- Key register cadastre
- Key register topography
- Distributor building and address information

(Possible) future tasks:

- Distributor large scale base map
- Distributor planning/zoning information
- Distributor valuation information
- Distributor sub-soil information

kadaster

USA catalyst SDI Developments

- Clinton Order
- Federal Geographic Data Committee
- National Clearinghouse
- Partnership marketplace
- Geospatial One Stop Shop OMB E government initiatives

<http://www.gsd.org>

15

New Initiatives in the USA

- Data. Gov in January 2009
- White Paper "Place Based Policies" August 2009
- Increasingly active role in the Space Community

<http://www.gsd.org>

16

User Driven Approach and Partnership Building in Canada

<http://www.gsd.org>

17

➤ Outline

- **GeoConnections Program**
- **Public Health Community**
- **Public Safety/Security Community**
- **Closing thoughts**

18

Canada

Successful SDI Development India

- India departments and public organisation use space observation data for SDIs.
- Minister of Science and Technology works on National GEO Authority.
- India industry and knowledge capacities grow and develop new media.

<http://www.gsd.org>

19

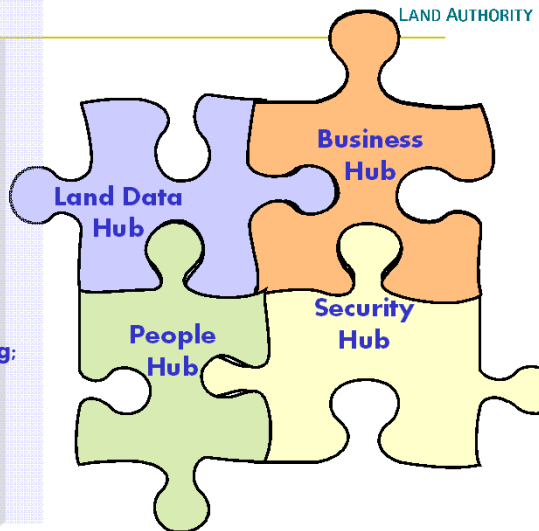

Vision and Goals of SG-SPACE

Vision
Towards a spatially enabled Singapore

Goals
Providing a mechanism to make available the interoperable, organised and authoritative geospatial information for:

- National level decision making;
- Public security;
- Cost effective business; and
- Location awareness among citizens.

<http://www.gsd.org>

20

Basic Vision in Australia "Spatial Enabled Government"

- Federal level: Priorities on national address files
- State of Victoria: Google Agreement Cadastral parcel locations
- State of Queensland: Integrated portal Cadastral Data
- State of West Australia: Shared Land Information Portal

<http://www.gsd.org>

21

Examples current relationships SDI and Earth Observation communities

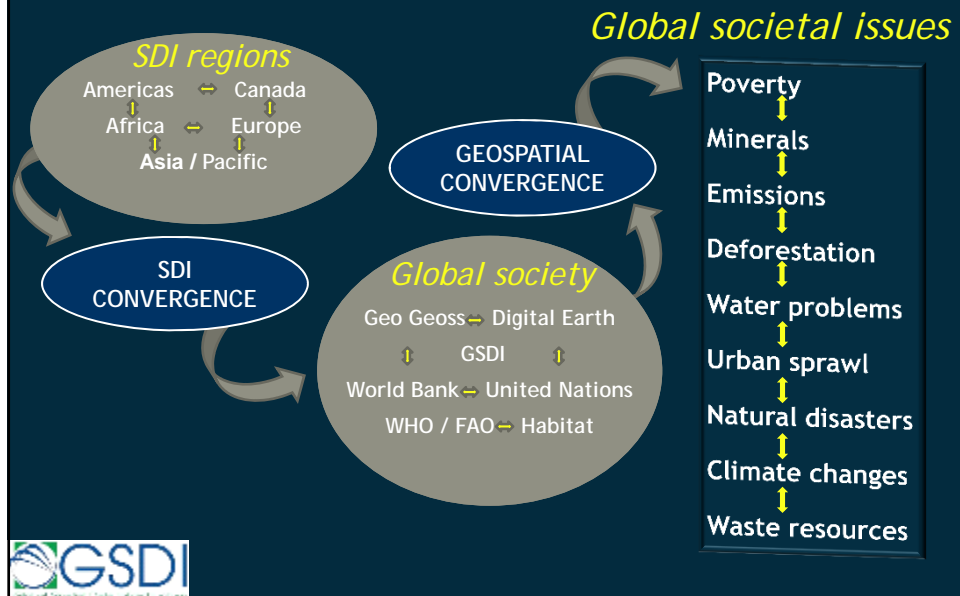

- USA: synergies between communities exchange spatial data and space data.
- India: through free access space information impact Survey of India.
- South America: increasingly use space information, impact on NCMA's .

<http://www.gsd.org>

22

GI Society: A Partner in Setting the Global Agenda

Next Steps

- Joint convergences GEO/GEOSS community and Digital Earth

<http://www.gsd.org>

24

GSDI Statement for Cooperation with GEO GEOSS

- *On Technical level: architecture similar- stimulating interoperability*
 - SDI registration with GEOSS
 - Share GSDI Cookbook with GEOSS
- *On Organizational level*
 - Support more data sharing principles
- *Creating Strategic Alliance*
 - Amplify success of both organizations
 - Seek similar level of ministerial and executive visibility
 - Support of contributed systems, products and services through coordinated efforts

<http://www.gsd.org>

25

Preparations for Cooperation with Digital Earth

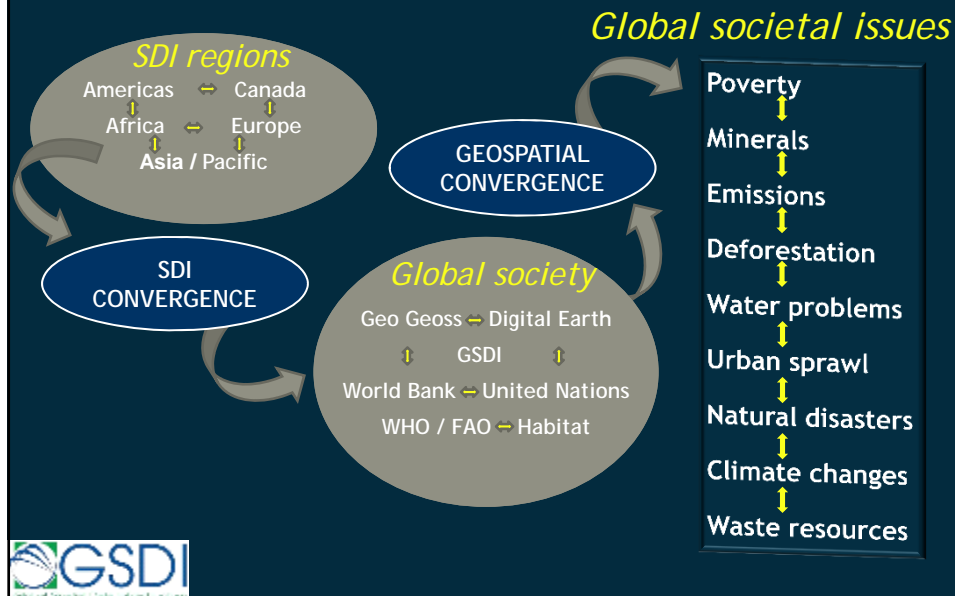

- *Work on optimized information access for different user groups*
- *Making preparations to set up strategic alliance with Digital Earth*
 - Collaboration realization " Next Generation Digital Earth"
 - Composing Global Knowledge Infrastructure for different communities
 - Conversion process spatial data in relevant user framework information.

<http://www.gsd.org>

26

GI Society: A Partner in Setting the Global Agenda

Convergences geo spatial communities for global decision making

- Rapidly changing geo spatial landscape
- Global problems
- Geo spatial community responsiveness.....

Conclusions

- Making use of successful approaches in regions.
- GEO GEOSS and Digital Earth making fast progress.
- Geo spatial sector sound partner in solving today's global problems.
