

# On line data and services provided by Survey of Israel

- ▶ The National Cadastral and Historic maps on-line archive
- ▶ National Geodetic Database (NGDB) – an online system
- ▶ National Spatial Geoportal, an online GIS system

**National Cadastral and Historic maps - An online archive**

The screenshot displays a web application interface for the National Cadastral and Historic maps online archive. At the top, there is a search bar and a table of search results. The table has columns for 'חלקה אחרונה מס' דין' (Last plot number), 'חלקה אחרונה ממ' א' (Last plot number A'), 'מספר חלקה אחרונה בהסדר' (Last plot number in order), 'חלקה אחרונה טאבו' (Last plot number in cadastral), 'סטטוס גוש' (Block status), and 'מוסדר' (Registered). Below the table, there is a section for 'נבחרו ענף/רשומות' (Select branch/records) with a list of document types. A map view is visible on the left side of the interface. Callouts highlight specific features: 'Displays related data from other data bases' points to a list of related records, 'Sorted by document type' points to the document type list, and 'List of results' points to the main search results table.

**National Geodetic Database (NGDB)**

מספר	שם	סוג	מיקום	מחוז	מספר	מיקום	מחוז
1	...	...	...	...	...	...	...
2	...	...	...	...	...	...	...
3	...	...	...	...	...	...	...

**Query by Control Point Attributes**

**Spatial Query by Circle or Rectangle**

**National Spatial Geoportal – an online GIS system**

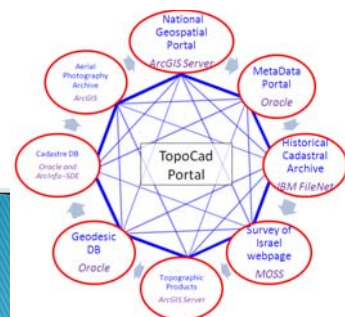

**Display thematic Layers**

**Query using natural language**

**Specific information about a particular object on the map**

The Survey of Israel is planning to expand the range of online systems under a unified user interface called Topocad which will include:

- \* Cadastral data from the GIS Cadaster DB;
- \* Aerial photographs and Orthophoto;
- \* Digital GIS topographic data.

I wish to express my thanks to my  
Colleagues Ms. Viera Lavan and Dr Yaron Felus  
for the contribution to this presentation

**Thank you for your attention**
